

Laserfab is a full service metal fabrication company supporting numerous industries with precision sheet metal and other fabrication needs. From simple one off parts to more complex finished weldments and assemblies, we have the proven resources and processes in-house to make your job easier. We provide rapid estimates and pride ourselves in responsiveness and detail.

Laser Cutting & CNC Punching

Laserfab offers robust cutting capabilities utilizing 7 lasers, two 16-shelf tower loaders along with stand alone cutting & punching.

Our lasers/CNC punches handle a maximum sheet size of 72" x 144" for processing steel, aluminum and stainless steel.

Thickness Ranges:

Steel: .020" – 1.00"

Aluminum: .020" - .250"

Stainless Steel: .020" - .375"

Brake Forming

Laserfab enlists a variety of brake forming equipment that allows us to manufacture small parts as well as heavy duty formings.

Our brake tonnage ranges from 80 to 500 Tons with bed lengths of 72" to 168".

Weld & Fab

Laserfab utilizes Mig and Tig welding to match specific material needs. We also provide in house fabrication that allows us to provide a finished product, kit, or assembly to our customer's specifications.

Machining

We offer light machining, drilling, tapping and countersinking in-house while also working with an expansive network of full service machine shops allowing Laserfab to provide a one-stop experience.

Delivery

Our fleet delivers daily and provides Kanban replenish for customers whose needs require that added benefit. Large or small, Laserfab does what it takes to ensure we can deliver anywhere, including confined business areas. Laserfab also works with local carriers upon request for any special delivery requirements.
